## Pre-Recorded Digital Messages on Hold System

The Emroth Technologies Pty Ltd Pre-Recorded Digital Messages On Hold system has been developed to provide low cost, high quality digital audio pre-recorded with up to 16 minutes of music, messages and/ or advertising. The price includes 16 minutes of professionally record messages/ advertising to your script with royalty free background music. Emroth Technologies Pty Ltd provides an update service where replacement Message Modules can be sent to you with new messages, advertising and background music.

**Features:**

- Up to 16 minutes of Sold State digital messages on hold.
- 100 year retention of messages.
- Low voltage plug pack operation.
- Comes with Royalty free CD with 60 minutes of background music and sample messages for examples and guidance for scripting of your own messages.
- All necessary cables supplied for connection to standard telephone systems.
- Line level/ headphone level output.
- Continuous play back looping.

**Description of Operation:**

To play - Connect to the music input or audio line level input on your telephone system to the Message On Hold Module "Line Out" using the supplied cable. Press the start button. Your pre-recorded message will start to play. When the message comes to an end it will start at the beginning again. If you want to listen to the message/

music without connecting to your telephone system plug the set of supplied Headphones into the "Line Out" connector on the Message On Hold module.
